Content 5

- Make any one article from waste products. (15)

Vase From Bottle Idea

Turn those cold drink or water bottles into pretty vases and make your home go green, in more ways than one!

What waste you need:

Glass or plastic bottle

Paint

Paintbrush

Masking tape (optional)

What to do out of these:

Wash the bottle to clean it and remove the label.

Paint the bottle in a colour of your choice.

Once the paint dries, top it up with another coat of paint so the colour is opaque enough.

You can also use masking tape to make patterns on the bottles.

Before painting, use the tape to make the design you want.

When you remove the tape after spray painting the bottle, that part will still be transparent and will look lovely.

Add a flower and your bottle vase is ready to adorn your living room!

Tin Can Chimes Idea

Add some music to your house using boring, old tin cans.

What waste you need:

3 or more tin cans with lids

Nail and hammer

Washers, one for each tin

Paintbrush

Paint

Wool string

Glitter

What to do out of these:

Paint the tin cans in different colours and add some glitter if you'd like to.

Once they're dry, make a hole at the bottom of each can using the hammer and the nail.

String a long piece of wool through the holes.

Tie the two washers at the other end of the string, inside the tin cans.

Hang the cans in a way that they overlap or hit each other when the wind hits them.
